The Rogers Group is committed to providing accounting and financial management support to meet the Federal government's key requirements relating to accounting, asset management, financial management systems, and budgetary development and execution. Our skilled professionals have achieved successful audit results at several Federal agencies and remain dedicated to increasing the reliability of critical data and information used by management and to support financial statement audits. We blend an audit and risk-based advisory approach to bring solutions and deliver services to help our clients address accounting and financial management objectives.

Program Management

Traditional approaches to Program Management support and project management are not delivering the results Federal agencies require. Program management teams continue to feel pressure from top management and executives to demonstrate how program and project management efforts are aiding and contributing to overarching financial management goals and objectives. The Rogers Group understands the Government faces increasing pressure to control spending while simultaneously improving services and meeting financial management goals and objectives.

Our core team of program management professionals are committed to providing value and have years of Federal accounting, financial management, financial systems, and CFO Act compliance experience. Our teams are staffed with experienced Project Management Institute certified Project Managers, functional experts, and thought leaders experienced in engagement delivery and execution. This allows our teams to help organizations identify solutions and adapt proven methodologies to unique operating environments.

The Rogers Group provides key resources to Government and Government Program Management Offices to offer advisory, technical, and functional support for project and program management. We are committed to:

- Continually monitoring program management support functions and highlighting potential risks;
- Providing verification that program management functions are properly aligned and targeted to help Federal agencies achieve compliance with audit readiness goals and objectives; and
- Reporting on progress and monitoring alignment of support functions to help improve performance, control costs, and manage resources to achieve successful delivery or programs and projects.

Our project management office lifecycle support services are critical in developing accurate financial reports, defining measurable performance standards, and managing life-cycle business and functional activities. We focus on essential functional and technical requirements to define scope, manage risk, and provide focused project management support. We have a commitment to our clients to remain accountable, provide transparency, and promote spending effectiveness.

Advisory Services

The Rogers Group broke from the traditional operating structure for providing advisory services to Federal agencies and reorganized itself to match clients' needs and requirements. We found clients wanting their professional services firm to understand their business and help them achieve their unique financial management initiatives. The Rogers Group's structure has allowed professionals to become trusted, well-rounded advisors, many of whom remain committed to the clients they support over their entire career.

Our restructuring has led to our audit and advisory professionals becoming heavy stakeholders in the Federal agencies they support by virtue of the work they do and the relationships they build. We have proven methodologies that have been tailored to respond to the unique requirements of our clients, while considering overarching Federal financial management and accounting laws and regulations.

We understand the pressures of accomplishing more with fewer resources, streamlining services, and reducing costs while improving productivity. The Rogers Group delivers effective approaches and provides certified and experienced professionals with years of financial management, program management, and accounting support expertise to assist clients with:

- Regulatory and Compliance Reviews
- Strategic Planning and Policy Support
- Quality Assurance/Independent Verification and Validation
- Information Technology Support for Financial System Implementations

The Rogers Group is committed to applying our Federal financial expertise to support and address the unique requirements of each client. Our personnel bring the knowledge, experience, and education related to Federal accounting, Information Technology, and Government auditing and accounting to meet the specific requirements and objectives of the clients we support. We have the technical knowledge, resources, and experience Federal agencies require to support agencies meet their financial management goals.
